Dear Mobility Friends,

By now, each of you has probably heard of my dad's passing this spring. Although my heart remains heavy, I know I am not alone. The most abundant evidence of my family's loving, extended family has been expressed by you, the friends and supporters of the Mobility Worldwide MN -- Twin Cities and Mobility Worldwide International. Your love and support have been overwhelming and sincerely appreciated. It has steeled my resolve, and that of many others who have pledged to carry on my dad's work. As we continue to provide the gift of mobility to people who have lost the use of the legs be assured that Mobility Worldwide MN -- Twin Cities has been built to last.

My dad devoted more than ten years of his life to ensuring the success of Mobility Worldwide MN -- Twin Cities. I assure you that the members of our Board of Directors and dedicated shop volunteers will settle for nothing less than honoring my dad's memory by doing all we can to make sure Mobility Worldwide MN -- Twin Cities continues to thrive and make life-transforming contributions to people in need of mobility around the world. Your love and support have been overwhelming and, with it, Mobility Worldwide and its mission will live.

Everyone associated with Mobility Worldwide -- MN -- Twin Cities continues to meet the challenges in reliably supplying finished carts to people in need. We've all worked hard. We've been imaginative. We've been resourceful. In true Minnesota fashion - together - we've made sure that people in need have received the invaluable gift of mobility. That will not change!
We all rejoice in now having produced well over 1500 carts and in sending them to Tanzania, Zimbabwe, the Middle East and other destinations for people in need of mobility; people living in the midst of war-torn civil war and abject poverty, and subject to some of the most demanding conditions in the world.

MW - MN - TC and Mobility Worldwide International exemplify an ever-maturing organization. We are nurturing new affiliates within an increasingly efficient shared distribution network and we're establishing new production and distribution partnerships across the country and throughout the world. We're broadening our sources of materials and streamlining supply lines and, together, we're also developing lighter, more durable - ultimately, more useful and transformational - carts.

My dad was very proud of these accomplishments - but he would be prouder still to know we are not done. Not even close. Thank you, yet again, for your love and support. You are the fuel that propels us forward. You keep the lights on, the rent paid and, most importantly, the carts moving toward the people who need them most.

Sincerely,

Laura Herman, President
