## Mobility Worldwide

# Theory of Change

Worldwide. Evidence of mobility assistance for people with lower-limb disabilities in underserved areas.

#### **ADVOCATE**

Lead advancement of hand-cycle community.

Establish and lead a consortium to develop hand-cycle best practices and produce high quality research that demonstrates positive impact.

Deeply integrate perspective, voice, and feedback from recipients and communities around the world, which are disseminated to key stakeholder to promote awareness.

Hand-cycle best practices published and distributed internally and externally.

Community led problem solving feedback loops drive decision making and strategic organizing.

International adoption and recognition of hand-cycles as needed adaptive product around the globe through elevated stories of user experience.

## **ENGAGE**

Create meaningful and impactful opportunities.

Engage with a diverse range of community members to create sustained commitment from volunteers that is driven by an open-door policy and promise of belonging and compassion.

Connect and inspire local suppliers, supporters, and community members to the mission through shop visits or office presentations and demonstrate impact to the broader community.

Increased volunteer participation from a wide range of people that represent a broader reach of the community, which leads to increased retention.

People and communities combat loneliness, promote purpose, develop connections, and produce high quality hand-cycles that create joy and compassion around the world.

#### **DELIVER**

Build, assemble, and distribute hand-cycles around the world.

Innovate, modify, and/or reaffirm design through data-driven evidence provided by recipients and their communities to ensure a grassroots focused impact.

Grow and maintain relationships among peers to seek support in problem solving, share lessons learned, and discover new opportunities that help efficiency and/or effectiveness.

Larger quantity of high quality hand-cycles produced with systems in place to streamline global distribution.

Producing new hand-cycles that are more cost-effective, efficient, and desired among recipients.

Individuals and communities are empowered and strengthened through use of hand-cycles that increase productivity and access to opportunities that yield an improved quality of life.

### THE CHANGE WE CREATE

Individuals and communities in underserved areas experience increased levels of mobility through advocacy and access to safe, durable, and sustainable hand-cycles.
