SUMMER NEWSLETTER 2026

Mobility Worldwide West Michigan Thanks YOU;

Every cent you give to our Mission helps to change the lives of Children throughout the world who don't have use of their legs.

Your kindness and warmth for these children help them go from dragging themselves through the dirt, or always staying at home; to being able to travel to school, attend church, play with friends, and eventually be a valuable member of society. Through YOU we can change lives.

Precision Metal Products Company: Dedicated Supplier

(Integrity, Quality and Services to Customers)

"For the body is not one member, but many." Those words from 1 Corinthians 12:14, could easily describe a human body, the church, Mobility Worldwide West Michigan as an organization and the mobility cart! All have members or parts, united for a purpose.

Precision Metal Products Company is a Holland family-owned screw machine parts manufacturer since the year 1946. They produce at least eight different parts for our Mobility Carts and have done so for years! The service of helping Mobility Worldwide West Michigan began under then President Floyd Jousma. President Mark Drooger continues the company commitment.

Precision Metal purchases the raw materials, sets up the parts needed, and produces them in a timely fashion. While the parts may seem small in size, they are vital to the operation of the cart!

Mark, a third-generation president, seeks no recognition for his company's support for Mobility Worldwide West Michigan. The company Mission Statement says it all: "Precision Metal Products Company is committed to being a world class turned parts manufacturer. Integrity, quality, and service to our customers shall be the basis of our operations."

Join Us for an OPEN HOUSE CELEBRATION to Thank the Lord and You!

- C**—Celebrate more than 8,500 Mobility Carts built that are Transforming Children’s Lives!
A—Acknowledge and Thank Financial Donors, Suppliers/Vendors and Volunteers!

T—Tour the Shop to better understand the production process.

Be part of the fun on Saturday, September 26, 2026, from 10am—12pm

414 E. 40th Street, Suite 3—Holland, MI 49423

Open House Reception with Light Refreshments

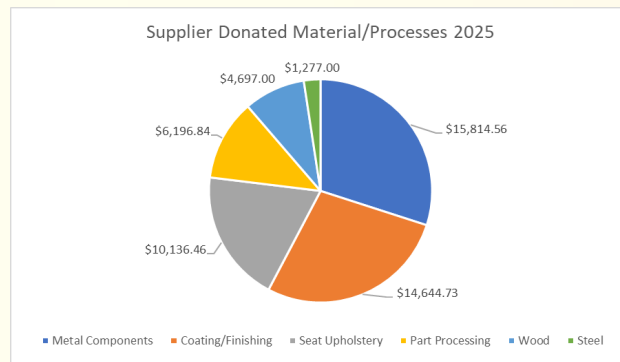

Coffee, Cider, Cookies and Doughnuts..... Come and Go as You Must!

THANK YOU Mobility Worldwide West Michigan Suppliers!

The West Michigan area is a manufacturing hub in the United States. Mobility Worldwide West Michigan’s shop has been blessed with the generosity of several of these companies. Some have contributed with Financial Donations, while others have Donated Materials or Processes needed to product the carts that help children throughout the work with mobility! Most of our suppliers have given at least a discounted price, allowing us to keep the over-all expense of a cart as low as possible. The estimate of fully donated material and processes for 2025 was \$52,766. That amounts to \$75 per cart produced during the year.

Below is a breakdown of our supplier’s generosity for 2025.

Category:	Amount:
Metal Components	\$15,814.56
Coating/Finishing	\$14,644.73
Seat Upholstery	\$10,136.46
Part Processing	\$ 6,196.84
Wood	\$ 4,697.00
Steel	\$ 1,277.00
Total	\$52,766.59

Invite Us to Share Our Story: Schedule a Presentation

Mobility Worldwide West Michigan is proud of our life-changing ministry to Children without the use of their legs. Please invite us to share our story. Schedule a presentation at your Church Mission Conference, Bible School, Non-Profit organization, Business, School, or Club. In a 10-30 minute time frame (your choice), we will touch your hearts with stories, videos and a cart demonstration.

For information concerning a presentation, please contact our office at 616.396.2031 or call Jo at 616.610.3442.

Please assist us by providing us with these details:

- Your name, email address, and phone number.
- Description of your group and location for presentation.
- Possible dates, times, and length of presentation.

Holland Mobility Carts: Show Room Ready

CRAFTED WITH CARE

Tom Webber is a gifted and talented woodworker who has graced the Holland facility since 2009. A craftsman by trade and by hobby, Tom left his mark at Sligh Furniture and Howard Miller. His 33 years at Howard Miller were packed with preparing new products for show rooms throughout the USA.

Al Kindig, Mobility Worldwide West Michigan's local facility founder, tapped Tom to help him create the boxes for the carts. The seat box, similar to a car's trunk, is the space below the seat. Tom also developed fixtures for standards for production. The aim was to make the production of parts self-explanatory and user friendly.

In 2009 and the early years, Tom volunteered three days a week, all day, to complete his tasks. Seventeen years later - he is still here, but usually only one day a week. Tom estimates that 35 volunteers now are the woodworking department. Tuesday, Wednesday & Thursday each week.

Tom Webber continues to believe in the Mission of transforming children's lives with the Gift of Mobility. He is an invaluable member of our team.

Mobility Worldwide West Michigan Container

In June and July of 2026 we sent out 2 shipments of Mobility Carts with our partners UNTO and Americare.

The first of these shipments contained 50 of the carts from Mobility Worldwide West Michigan (MWWM). The shipment in July contained 200 carts. These carts are enroute to Jordan, Sierra Leone, Kyrgyzstan, and a few more countries in Africa and in the Middle East.

The children whose lives will be transformed by the mobility they received with this precious gift, can "Thank YOU" — the donors and volunteers who made this happen.

In this picture, Dale Dykema carefully loads the truck with Mobility Worldwide West Michigan carts. On their way to be a life-changing gift!

Camaraderie Through a Common Purpose

Mobility Worldwide West Michigan has over 70 active volunteers, all committed to giving the Gift of Mobility and Dignity to unseen young neighbors with leg-handicaps. What a blessing it is to me, to volunteer to help others in far corners of the world!

A recent Tuesday morning, three of us discussed the value of camaraderie through common purpose. While some tasks are more mundane than others, and some demand more skill, we enjoy our “work time” and “break time”. Long lasting friendships have developed over work, coffee and cookies. During yesterday’s break, Dale Dykema briefed us on harvesting honey and sent us home to our honeys with pints of the nectar.

We have good news: Next month I will be visiting Penny Farms, the Florida shop hosting the fall meeting of our affiliates. (Our founder Al Kindig was moved to establish this shop in 2009, after touring Penny Farms.) Our college student marketing intern, Kelsey Dokter, is in Zambia, as a Joann Shore Memorial Recipient. She will participate with this year’s distribution of carts, like the one in the photo. This photo shows a six- year -old recipient determined to prove “he’s got this” to his mother.

In addition to our volunteers, I am grateful for our prayer partners, suppliers, distribution partners and donors. As the donations come in, we gladly build the carts! Thank you to those interested in touring the shop and those inviting us to present at your site.

Thanks to all of those committed to changing the world; one child at a time.
